## Section B: 5 Questions (2 marks each) Work out the following sums and write the answers in the spaces provided.

| 11. | Write 3728 in words.                           |
|-----|--|
|     | Ans:   |
|     | What is the quotient when 569 is divided by 8? |

| e: 1840-18-0 |                        | Ans:              |
|--------------|------------------------|-------------------|
| 3.           | 7 × 9 = 70 -           | ?                 |
|              | What is the missing nu | Imber in the box? |
|              |                        |                   |
|              |                        |                   |
|              |                        |                   |
|              |                        |                   |

14. There are 732 tables in Hall A. There are 139 more tables in Hall B than in Hall A. How many tables are there in Hall A and Hall B altogether?

Ans:

15. I am thinking of two 1-digit numbers that have a difference of 3.
I multiply the sum of these two numbers by 6.
The answer has digit 4 in the ones place.
What are the two numbers?

Ans: \_\_\_\_\_ and \_\_\_\_\_
